THE COMMERCIAL COLLECTION

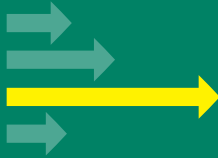

Bissell[®]
BigGreen Commercial[™]

We've Gone Commercial
in a **BIG** Way...

THE ART OF CLEANING IS A BISSELL CORE COMPETENCY.

We are continually looking for ways to improve this art — from subtle advances such as stronger cleaning brushes and units with wider cleaning paths to new products that meet today's tough cleaning challenges. It seemed only natural that we could extend this capability to commercial applications. Working with product development partners, we can now offer a series of products built to perform exclusively in harsh, commercial environments — rugged materials, durable components, yet easy to operate and maintain. All were rigorously tested to meet or exceed industry standards.

DEEP CLEANER

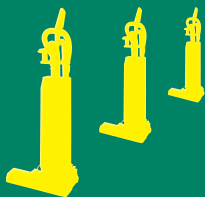

BISSELL is the leader in deep cleaner technology and brings this background to a heavy-duty system that combines superior cleaning strength in a unit that is easy to set up, maneuver, and maintain.

CLEANING FORMULAS

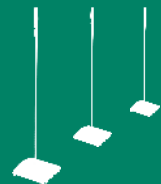

From handling spot cleaning to attacking tough stains, BISSELL offers a selection of products that combine earth-friendly formulation and technology that offer effective cleaning.

VACUUMS

BISSELL vacuum cleaners are available in a range of sizes and cleaning paths depending on the environment. Each features a rugged, high-impact design, sturdy cleaning elements to ensure consistent performance, and easily accessible components for maintenance and repair.

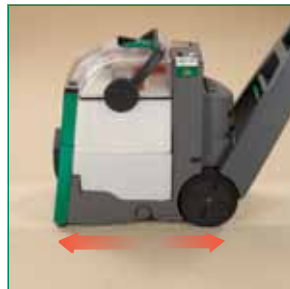

SWEEPERS

These hallmark BISSELL products remain the standard in handheld cleaning convenience. Lightweight, easy to maneuver, and highly efficient, they are ideal for quick, light-duty cleaning chores.

BG10™

A Commercial Deep Cleaning Machine

Cleans Better, Dries Faster than the Leading Rental Carpet Cleaner*

Features:

- Flow Indicator monitors water and solution levels
- Removable clean and dirty water tanks
- Adjustable handle folds down for compact storage
